Introduction to GDOT's Standard Files for CAiCE's Visual Transportation 10

I. CAiCE Standard Settings Files

A. Standard files for “In-House” and Consultants are controlled by GDOT

B. CAiCEAll.exe – loads all settings files

1. Internal and External Web-Page Location:

http://www.dot.state.ga.us/dot/preconstruction/r-o-a-d-s/SWFilesDocs/SW_Design/SW_Design_KC_Files/index.shtml

2. Updated regularly

CAiCEALL is updated frequently. The latest revisions are listed on the “History (Brief)” Web-Page, but a complete history of ALL changes made to the standard files can be found on the CAiCEALL “History (Full)” Web-Page.

Internal and External “History (Brief)” Web-Page:

http://www.dot.state.ga.us/dot/preconstruction/r-o-a-d-s/SWFilesDocs/SW_Design/SW_Design_KC_Files/KCALL_History.shtml

Internal and External “History (Full)” Web-Page:

http://www.dot.state.ga.us/dot/preconstruction/r-o-a-d-s/SWFilesDocs/SW_Design/SW_Design_KC_Files/KC_ALL_Full_History.shtml

II. Downloading and Running CAiCEALL:

Exit all CAiCE software programs.

Go to the R.O.A.D.S. “CAiCE Standard Files Download” Web-page:

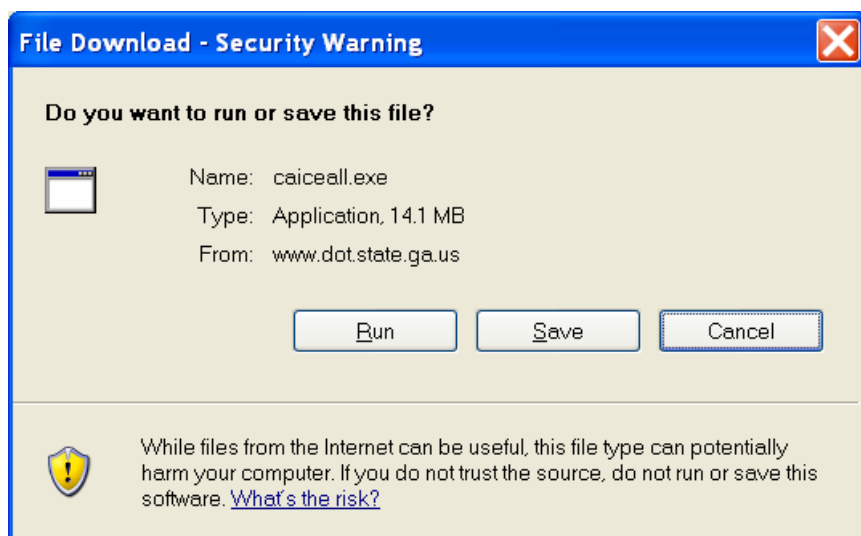

http://www.dot.state.ga.us/dot/preconstruction/r-o-a-d-s/SWFilesDocs/SW_Design/SW_Design_KC_Files/index.shtml

Click CAiCEALL.EXE “Download”

File	Rev. Date	Size	Download (WINZIP.EXE)	Contact
 CAiCEALL Download Instructions	6/15/05	161kb	 Download (204kb)	Solutions Center
CAiCEALL EXE File	12/5/05	14.5MB	 Download (14.5MB)	Solutions Center
CAiCEALL History (Brief)	12/5/05	N/A	N/A	Solutions Center
CAiCEALL History (Full)	12/5/05	N/A	N/A	Solutions Center

(NOTE: The following screen captures reflect Windows XP SP2 Operating System Dialog and Message Boxes. Depending on the Operating System in use – the screen captures below may vary.)

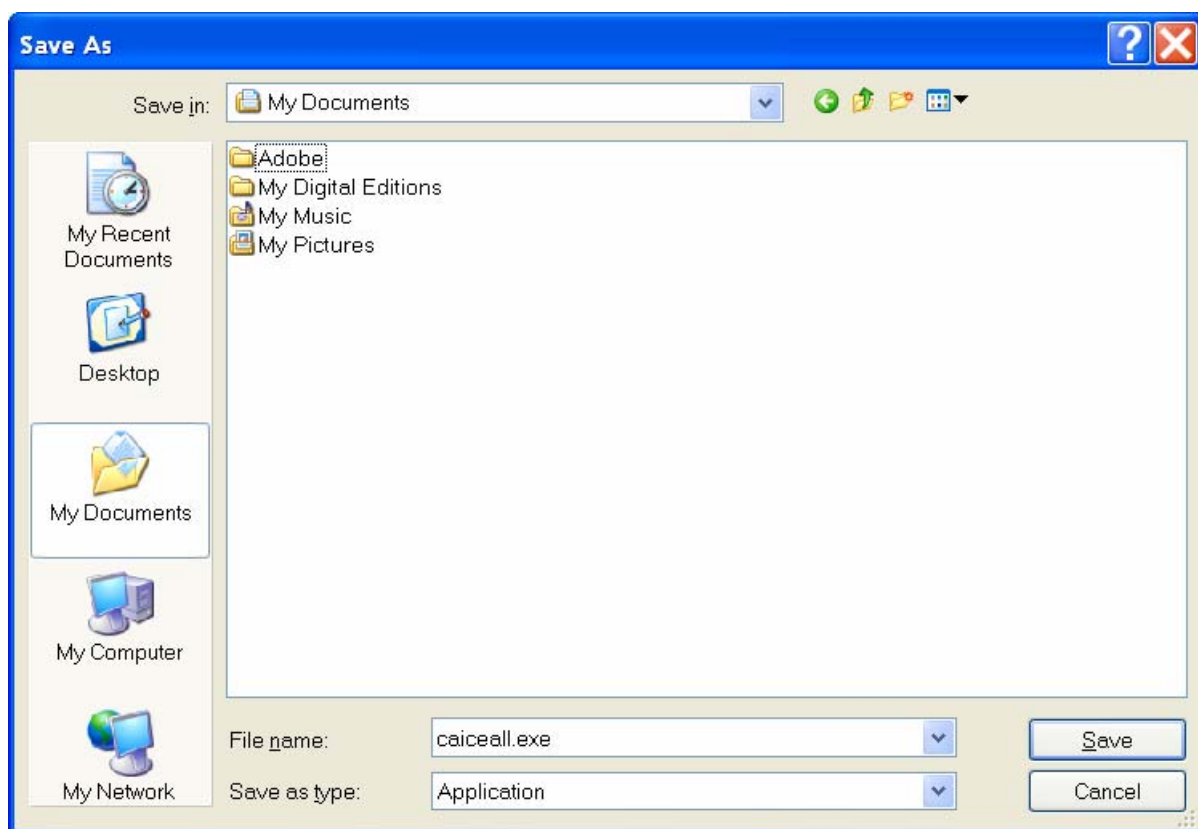

The following screen should appear:

Click the "Save" button

(DO NOT run CAiCEALL from the web page. If you run CAiCEALL from the web page you will not get all the updated information).

A "Save As" dialog box similar to the screen capture below should appear:

Navigate to a temporary folder to store the downloaded file (recommend some place like "C:\My Documents") and click "Save"

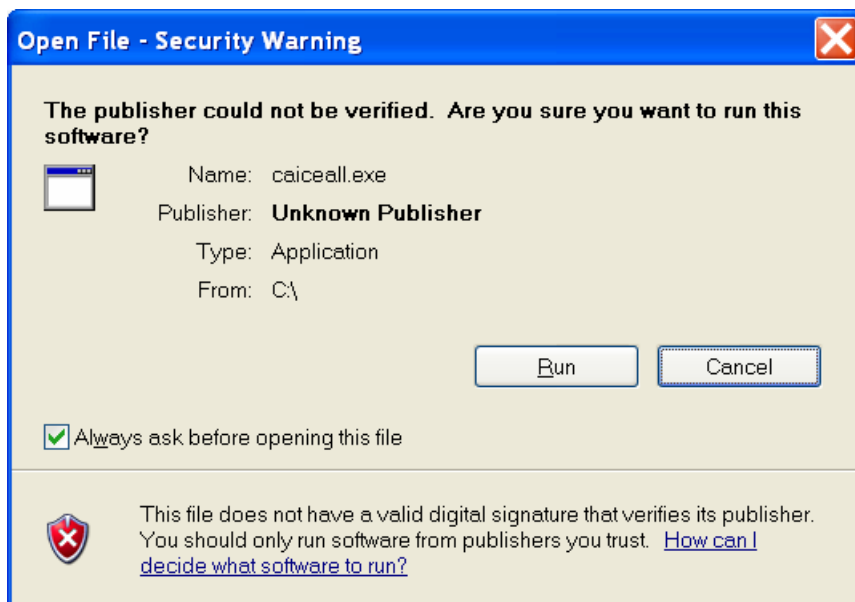

Exit Internet Explorer

Close CAiCE (if it is running)

Open Windows Explorer and navigate to the folder where you stored CAiCEALL

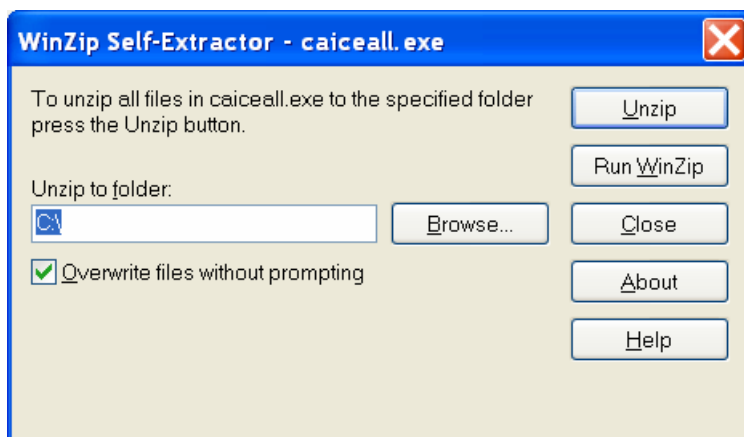

Double click on CAiCEALL.EXE

The following screen should appear:

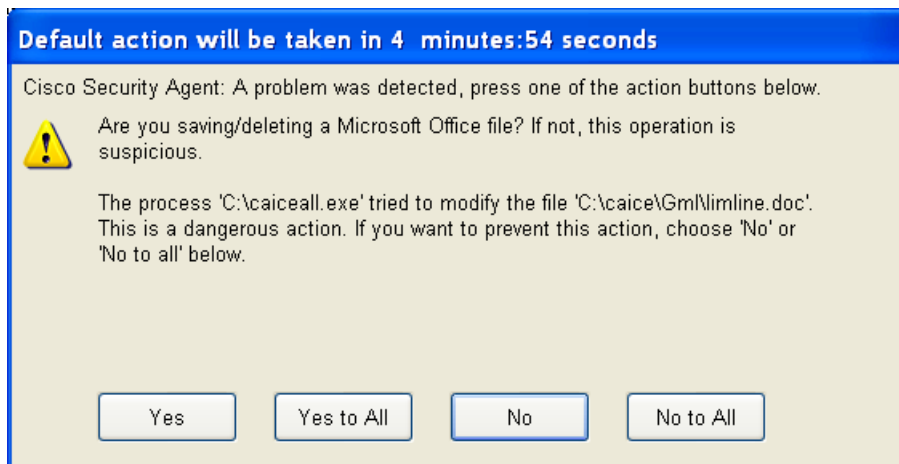

Click "Run"

The WinZip Self-Extractor defaults to the "C:\" drive. Most PCs in GDOT have CAiCE installed on drive C:. If CAiCE is **NOT** installed on the C: drive, click on the window with the drive letter and change the drive to the appropriate drive CAiCE is installed on as shown below. Otherwise leave the drive letter as C:\. (Enter only the **Root Drive** where Caice is installed – **DO NOT enter the full Caice location path**).

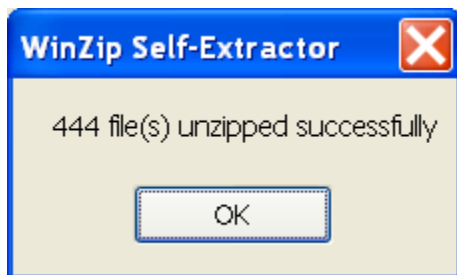

Click “Unzip”

If a “Cisco Security Agent” Dialog should appear when running the Caiceall executable – please select the “Yes to All” Command button. See Screen Capture below.

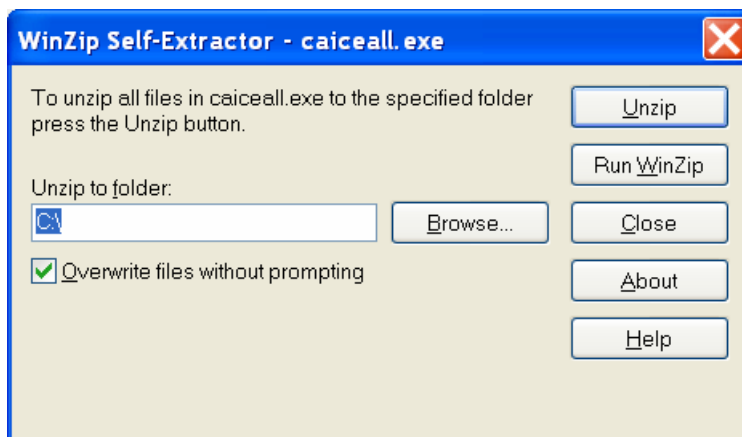

After the Caiceall executable has completed processing - the following screen should appear:

(NOTE: the number of files is subject to change)

Click “OK”

Finally click “Close”

The GDOT standard Caice files have been updated and you are ready to run CAiCE’s Visual Transportation 10.
